

## Infrastructure assessment and economic evaluation of infrastructure projects

Infrastructure assessment and economic evaluation of infrastructure projects

ACIL Tasman's consultants can provide evaluation services for infrastructure assessment projects, including environmental, social and regulatory impacts.

ACIL Tasman's experience covers a broad range of work on infrastructure assessment and evaluation studies including:

- evaluation of an inland railway between Melbourne and Brisbane
- review of pre-and post-construction evaluations of road projects
- analysis of water supply options for the WA Goldfields
- analysis of waste water schemes and desalinisation plants
- market analysis for ports and railways.

See our infrastructure assessment case studies.

Contact ACIL Tasman for more information about infrastructure assessment, evaluation, pricing and policy projects.
