

Economic evaluation of infrastructure projects

Economic evaluation of infrastructure projects

ACIL Tasman consultants can provide evaluation services for infrastructure projects, including environmental and social impacts.

ACIL Tasman's work in evaluation studies cover a broad range of infrastructure projects including:

- evaluation of an inland railway between Melbourne and Brisbane
- review of pre-and post-construction evaluations of road projects
- analysis of water supply options for the WA Goldfields
- analysis of waste water schemes and desalinisation plants
- market analysis for ports and railways.

See our infrastructure assessment case studies.

Contact ACIL Tasman for more information about infrastructure programs, pricing and policy case studies.
