

## Maritime, shipping, ports and harbours – reform and operations

Maritime, shipping, ports and harbours - reform and operations

ACIL Tasman's projects in ports and maritime transport covers best practice comparisons, competition, policies, port development, stevedoring and freight subsidisation.

Projects include:

- port and shipping reform in Australia and New Zealand
- maritime safety, search and rescue
- competition between ports and within ports
- search and rescue strategies
- comparison of cost and logistics of alternative transport modes
- assistance to mining clients with negotiation of rail and port arrangements.

Examples of our maritime assignments include:

- freight subsidies
- shipping discussion agreements
- coastal shipping policies
- strategic assessment of port and harbour development options
- stevedoring
- port efficiency
- ferry operations
- port and waterfront reform, practices and international comparisons.
